Abstract

Briefly present the research project or technological development, indicating its main objective, the methodology employed, and the expected or achieved results.

Keywords: Keyword 1; Keyword 2; Keyword 3; Keyword 4; Keyword 5. (Three to five keywords.)(de tree a five)

1. THE PROBLEM AND THE PROPOSED SOLUTION

Describe the problem addressed, the proposed solution, and its relevance and expected contributions to society, the university, or the productive sector.

Describe the developed solution, explaining how it works, its main characteristics, and its distinguishing features.

Indicate the current stage of development (concept, prototype, laboratory validation, real-world validation, implementation, etc.) and briefly justify it.

2. TECHNOLOGIES, METHODS, OR TOOLS USED

List the technologies, programming languages, equipment, software, methodologies, standards, laboratory techniques, or instruments used in the development of the proposed solution.

3. RESULTS OR VALIDATION EVIDENCE

Present the main results achieved, tests performed, prototypes developed, performance indicators, comparisons, or any evidence demonstrating the effectiveness and feasibility of the proposed solution.

4. APPLICATION POTENTIAL AND IMPACT

Explain where the proposed solution can be applied, who the potential beneficiaries are, and the expected scientific, technological, economic, social, or environmental impacts.

5. FUTURE WORK

Describe the planned activities for the further development of the proposed solution, such as additional testing, improvements, intellectual property protection, technology transfer, or continuation of the research.

6. REFERENCES
